

PRESSING MACHINE  
FOR COSMETIC POWDER  
LM 5 C

# PRESSING MACHINE FOR COSMETIC POWDER LM 5 C

Vertical hinged  
opening system

**Model LM 5 C**

Description

Machine suitable for cosmetic powders compaction such as eyeshadow, blush, face powder, in pans of different materials, then to be packed in the trousse.

Made with a very strong welded tubular structure, with stainless polished panels in AISI 304 and polished chromium plated base.

The pressing cap has a **vertical hinged opening system**.

The machine is equipped with:

- Double and separate compacting pressure regulation from the front touch screen panel. Both pressures can be adjusted according to different requirements.
- Hand pump for the lubrication of sliding points.
- Certified safety valve to stop an accidental down stroke of the pressing cap.
- Two adjustable air connectors for pressure regulation.
- Multifunctional touchscreen panel, four basic work programs: ‘fondello’, ‘tassello’, ‘cassata’ and ‘manuali’.
- PLC for control of all the machine functions.
- Safety protection.

Optional:

- Device for the remote assistance.
- Compactness cylinder with long upstroke for double molds.
- Up to 10 different pressing cycles.

Technical specifications		LM 5 C
Installed power	kW	2
Mains voltage	V	400 3ph
Frequency	Hz	50/60
Height	mm	1750
Width	mm	900
Length	mm	1300
Weight	kg	900
Operating pressure	bar	120
Hydraulic unit	Lt	35
Control panel		colour touchscreen

*We reserve the right to implement modifications without notice*

We make also stamping dies if required.
