PRESSING MACHINE FOR COSMETIC POWDER LV 120 B

Modello LV 120 B

Description

Machine suitable for cosmetic powders compaction such as eyeshadow, blush, face powder, in pans of different materials, then to be packed in the trousse.
Made with a very strong welded tubular structure, with stainless polished panels in AISI 304 and polished chromium plated base. The pressing cap has a **vertical opening system**.

The machine is equipped with:

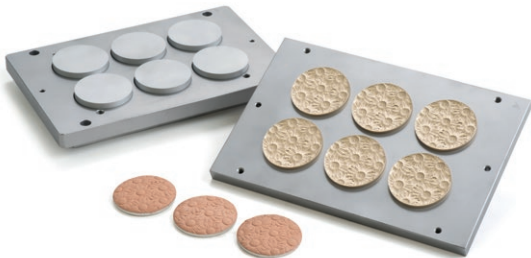

- Double and separate compacting pressure regulation from the front touch screen panel. Both pressures can be adjusted according to different requirements.
- Hand pump for the lubrication of sliding points.
- Safety mechanical locking system of the pressing cap.
- Three adjustable air connectors for pressure regulation.
- Multifunctional touchscreen panel, four basic work programs: ‘fondello’, ‘tassello’, ‘cassata’ and ‘manuali’.
- PLC for the control of all the machine functions.
- Safety protection barrier on two sides

Optional:

- Cloth unrolling device.

- Device for the remote assistance.
- Hydraulic system with oil temperature control device.
- Opening key for locking handles.
- Up to 10 different pressing cycles.
- Oil flow controller with high precision egulation of the compacting cylinder.
- Compactness cylinder with long upstroke for double molds.

Technical specifications		LV 120 B
Installed power	kW	4
Mains voltage	V	400 3ph
Frequency	Hz	50/60
Height	mm	1800
Width	mm	1720
Length	mm	900
Weight	kg	1300
Operating pressure	bar	130
Hydraulic unit	Lt	70
Control panel		colour touchscreen

We reserve the right to implement modifications without notice

We make also stamping dies if required.
