Part of the Palamatic Group

Palamatic

Palamatic Ltd have supplied lifting equipment from their headquarters in Chesterfield, England into the Pharmaceutical industry since 1985. As interest grew for safe lifting and handling solutions within the Pharmaceutical industry, Palamatic focused resources on designing a purpose-built range of lifting and handling equipment to meet the rigorous standards of the hygienic process industries. By 2004 sales of the hygienic range of lifting and handling equipment warranted dedicated resources and at this point the PalPharma division was established with a team of technical sales and engineering resources, skilled fitters and dedicated office and assembly areas. PalPharma is now an established and leading force in handling solutions for the Pharmaceutical, Healthcare, Medical, Fine Chemicals, Cosmetics and Nuclear industries.

PalPharma includes an experienced sales network and project team with in depth knowledge of the Pharmaceutical industry able to advise and offer new ideas for solutions to your handling requirements.

Mobile Equipment for Drum, Container and Product Handling

The **PalPharmaMove** include a range of manual, pneumatic or electric powered cGMP designed mobile lifting systems based on the principles of the **PALPharma-Hoist** and **PALPharmaTip** ranges

Mobile Drum Truck with powered drive and gripping and inverting

The **PalPharmaMove K9** is a powered electrical or pneumatic, counterbalanced truck for transportation of drums, boxes, IBC's and other containers between production areas, and for transferring material into and out of application specific containment machines handling active, or highly potent compounds where operator protection is an important consideration.

The K9 basic unit consists of wheel in motor traction drive with rudder steering assembly and forward / reverse finger rocker switch. 1900mm high mast giving 1200mm stroke. Electric raise lower. Two drive controller and battery pack. White FDA approved sealing strip to cover the front face and offer GMP. Basic execution in StSt304 with 180 grit finish. 250Kgs capacity including end effector.

Mobile Telescopic Drum Trolley with powered raise lower

The **PalPharmaMove M7** manual push pull trolley and straddle base is suitable for transporting drums, IBC's, containers, bottles, boxes, sacks and autoclaves.

The basic unit consists of stacker/ straddle type mobile frame with 4 free rotating castors (2 braked). The unit is powered up/down pillar with either battery or pneumatic operation and can achieve 3.2m of stroke with a telescopic mast. The basic unit is Stainless Steel 304 with 180grit finish. The unit can achieve a capacity of up to 275kg.

The system can be powered pneumatically or electrically with no use of hydraulics. The pneumatic version is suitable for ATEX environment.

Mobile Drum Trolley with manually propelled raise lower

The **PalPharma** Mobile drum trolley includes a fixed mast and raise lower is achieved using a simple push button for accurate positioning of the drum at the correct height. The trolley is fitted with castors so that it can be easily moved from area to area.

Mobile Drum Trolley with handwheel raise and lower

The **PalPharmaMove M3** is a manual hand cart with manual raise lower suitable for transportation of drums, containers, bottles, boxes and sacks between areas.

The unit is available with a variety of end effectors and raise lower strokes which make it ideal for simple transport, docking, and lifting tasks in process areas.

ATEX version is available.
