

SPIRAL FREEZER

'Self Stacker'

The unique full plastic self-stacking spiral freezer

For sure the most compact spiral freezer on the market with an effective single pass horizontal airflow.

A large industrial spiral freezer, likely for food processing, featuring a series of vertical blue panels arranged in a circular pattern. The panels are supported by a white metal frame. The machine is situated in an industrial setting with other equipment visible in the background.

Easy to clean and ideal hygienic conditions as no belt support is required. Compared to traditional build spiral freezers we can create up to 50% more capacity within the same available height.

Well sanitary designed,
robust construction and
experience-selected
quality materials are
the features that
provide a reliable,
trouble free solution.

BENEFITS

- Effective single pass horizontal airflow.
- Easy to clean as no belt support is required.
- Compact, up to 50% more capacity within the same available height.
- Lowest cost of ownership compared to other self stacker spiral freezers.
- No chains required to drive the belt.
- Longer beltlife compared to stainless steel selfstacker belts.
