

Crate washer

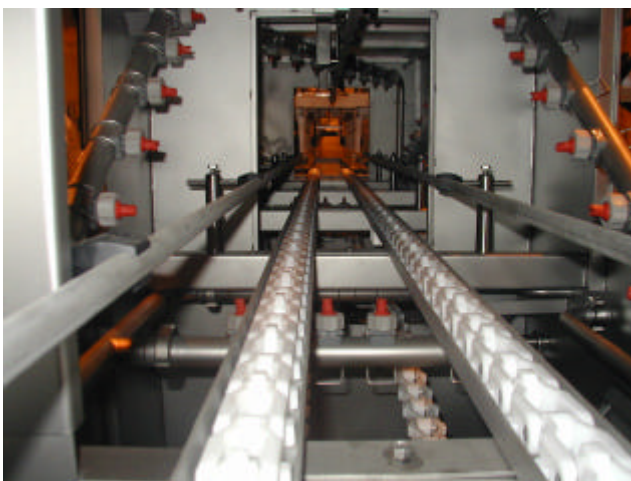

KWM S121 ...

Decades of experience combined with modern technology enable us to offer top quality products, featuring:

- Rust-resistant structure ensuring a long serviceability of the machine
- Thorough and gentle cleaning of a great variety of case types
- Individual adaptation to the operating requirements by fine-step modular design
- Stepless main drive through frequency converters allowing an easy integration into existing case conveyors

The cases are cleaned reliably from all sides. The clampable cone nozzles are adjustable within a wide range and can thus be adapted to the special characteristics of the cases. Narrow chain conveyors ensure excellent cleaning also from below.

According to special requirements or wishes we offer the following accessories and special designs:

- Connection for waste water from the Bottle Cleaning Machine
- Lye dosage / Disinfection
- Automatic preparation of operation
- Turnover unit for case infeed and discharge sections
- Bottle ejector for PET bottles
