FlexTrans from Romaco Siebler

The Siebler FlexTrans is the perfect solution for connecting primary packaging machines with a variety of different cartoners. With a 2 to 8 lane operation (depending on type and size of product) up to 900 packs/min. are handled. A wide range of pack sizes can be processed. The transfer/stacking technology allows fully automated parameter setting from the stored format recipe.

Highlights
- Accurate pick+place operation
- Camera guided pick-up
- Rejection of non-qualified packs
- Minimized stress on finished packs
- Various stacking patterns available
- Quickest format change-over
- Individually pluggable suction heads
- Adjustable stacking unit
