trackpca_

COMPLETE SOLUTION FOR SERIALIZATION AND AGGREGATION

SEAVISION

Track and trace workstation

Trackpca. Print. Control. Serialize. Aggregate.

Trackpca is a complete, flexible and ergonomic semi-automatic workstation for the **serialization of cartons** and the **aggregation of cases on pallets in small spaces**.

Easy to use	Easy format change	Compactness	Optimized user interface	Flexibility

With Trackpca, it is possible to print and control variable data and codes on cartons of different formats, even non-serialized ones and to print and control labels for cases and pallets.

Trackpca has an **integrated vision system** capable of managing the serialization of cartons and the eventual carton-case and carton-case-pallet aggregations, all thanks to the availability of a **dedicated aggregation module**. The system performs ANSI grading controls of printed codes and it also handles partial cases and pallets.

Thanks to a simple adjustment of the lateral guides and of the camera position, it is possible to handle cartons and cases of **different sizes**.

Control results are shown on the display in real-time along with instructions regarding the steps to execute, maximizing clarity and visibility for the operator.
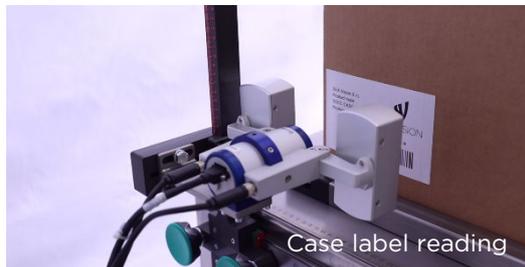

Adjustable guide

Rejection management

Case label printing

Case label reading

The system is specifically designed for pharma market

The workstation is compact, flexible, ergonomic and designed to be **easily integrated in any production environment** and it can be moved close to the packaging lines when necessary.

Cameras and illuminators are specific for the optimal reading of variable data and of the codes on the cartons. The wireless scanner allows to smoothly perform the **reworking operations**.

The system is compliant with all the regulations of the pharmaceutical industry, with user access regulated by the directives of the FDA 21 CFR part 11 regulations. All events are registered in an audit trail file. Software development is Gamp 5 compliant.

yudoo_

Native integration with SEA Vision systems

TrackPCA is a solution that natively integrates with trackability systems and with Yudoo, the 4.0 software suite for the centralized production management.
