

Manual Syringe Stopper Press

Quick & Efficient

- Efficient insertion of stoppers into pre-filled glass or plastic syringes, of 6.35mm bore or greater.
- Robust and reliable, for a professional quality finish every time.
- Compact, space-efficient footprint, to conveniently fit on a small work bench.
- Simple and intuitive functionality – get started right away!

Exceptionally hygienic, international pharma-quality compliant

- The process ensures that all air is expelled from the syringe.
- Hygienic 316L pharmaceutical grade stainless steel contact parts, to eliminate the risk of contamination.
