## System description

The XT conveyor system is a twin-track, flexible plastic chain pallet conveyor. The system is especially well suited for manual and automatic assembly and test systems in the automotive and electrical/electronics industries. A range of conveyor components for pallet handling can be ordered. Functions such as conveyors, transfers, stops, locates, lift-and-rotates and supports can be integrated in the conveyor module or be ordered as kit.

## Examples of application areas

Manual and automatic assembly and test systems in the automotive and electrical/electronics industries. Examples: gearboxes, computers, sewing machines, mobile phones, automotive seat guiderails, eyeglasses, injection-moulded parts, fishing reels, car instrument kits

## Conveyor XTC and XT

### Divert/merge devices

Divert/merge devices are used for routing products by dividing or combining flows of products. Usually there is a main conveyor, a “highway” (XT), and separate subordinated conveyors, “satellites” (XTC).

On the satellites, products can be subjected to various operations such as turning, grinding, assembly or testing, without disturbing the main flow. After the operations, the products can return to the highway.

A combination of a highway and one or more satellites is often called a cell. Using XT Pallet functions, it is possible to build cell junctions which facilitate transfer of a pallet from one cell to another, see figure below.

## Technical characteristics

System	XTC	XT
Beam width, single track	45 mm	45 mm
Chain width	35 mm	35 mm
Chain pitch	12,7 mm	25,4 mm
Drive unit capacity	400 N (at 5m/min)	1250 N- 1800 N
Chain tension limit	200 N (100 N conductive chain)	900 N (360 N conductive chain)
Standard pallet sizes	240x240 mm up to 640x640 mm, including rectangular sizes	240x240 mm up to 640x640 mm, including rectangular sizes
Horizontal plain bends:	90°/180° (Maximum 2x90° or 1x180°)	90°/180°
Horizontal wheel bends	--	90°/180°
Vertical bends:	5°, 15°	5°
<b>Maximum:</b>		
Conveyor length	4 m	25 m
Conveyor speed	20 m/min	20 m/min
Accumulated weight at 5 m/min	100 kg	250 kg
Pallet weight	See “Technical specifications” on page 382.	
Permitted load / 100 mm conveyor	8 kg	8 kg

### Conveyor - introduction

XTC is a twin track conveyor system specially designed for shorter transportations up to 4 meters. It has a slim design making it suitable to use in narrow spaces.

XTC conveyor can either be used together with FlexLink standard XT pallets or be ordered in a custom width for customer specific pallets or bins.

Certain components in a XTC conveyor, such as legs and beam sections, can be ordered pre-assembled.

### Beam design

The XTC beams are designed for rigidity, smooth running and low noise. The T-slots ensure easy but rigid attachment of accessories such as guide rail brackets. Connecting strip kit XUCJ 50 is placed in the middle of the beam keeping the T-slots free.

### Examples of application areas

The XTC conveyor is often used in satellite stations and for connection to machines. It can also be used in main flows where a modular and silent solution is required. Each conveyor will then only be handling one pallet at the time.

Conveyor beam section

Qty of cross section beams:	
170-1000 mm	1 pc
1001-2000 mm	2 pcs
2001-3000 mm	3 pcs

Beam section (assembled) configured item\*

PW= 240, 320, 400, 480, 640

L= Length to order (170–3000 mm)

W= Width to order (180–800 mm)

XUCB LD

Beam section (assembled) for pallets 240 mm wide.

L= Length 3000 ±1,5 mm

XUCB 3D210

Beam section (assembled) for pallets 320 mm wide.

L= Length 3000 ±1,5 mm

XUCB 3D290

Beam section (assembled) for pallets 400 mm wide.

L= Length 3000 ±1,5 mm

XUCB 3D370

Beam section (assembled) for pallets 480 mm wide.

L= Length 3000 ±1,5 mm

XUCB 3D450

Beam section (assembled) for pallets 640 mm wide.

L= Length 3000 ±1,5 mm

XUCB 3D610

\* Use online configurator when ordering

## Conveyor beam

Beam  
Length 3000 +10/-0 mm  
Length to order (30- 3000 mm)

**XUCB 3**  
**XUCB L**

The beam has the same T-slot as used in the XF structural system.

## Connecting strip kit

Drill instruction

Connecting strip kit  
Aluminium

**XUCJ 50**

Including M8 screws.

## Drill fixture for conveyor beam

Drill fixture for conveyor beam

**5123264**

To be used when drilling a 13 mm hole for Connecting strip kit XUCJ 50.

## Beam section for chain installation

Beam section kit

**XUCC 65**

Including connection strips and screws

## Tools and accessories, 30×30 beam

### Beam 30 mm × 30 mm

Beam 30 mm × 30 mm  
Aluminium, anodized  
Length 3000 mm (3030 ±5 mm)  
Length to order (30- 3000 mm)

**XFBM 3×30**  
**XFBM L×30**

Used for XTC

### Fastener yoke for 30×30 beam

Fastener yoke assembly  
Length 30 mm

**XFAF 30**

### Drill fixture for fastener yokes

Drill fixture for fastener yokes  
(Ø12,2 mm)

**XFAD 12**

To be used when drilling a 12 mm hole for fastener yoke XFAF 30, located 20 mm from the beam end.

Slide rail configuration

The following figures show the slide rail options applicable to XTC conveyors.

With pallet side guides

No pallet side guides

Cover strip

Cover strip for T-slot  
Length 3 m  
Polyvinyl chloride, grey

Rivet tool **3923563**

Mounting tool for slide rail

Mounting tool for slide rail **XTMR 160 A**

Aluminium rivets 3 mm

Aluminium rivets 3 mm **XLAH 3x6**  
Note. Contains 250 pcs.

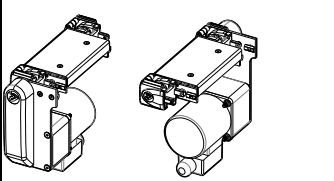

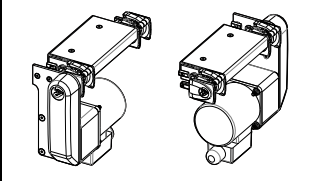

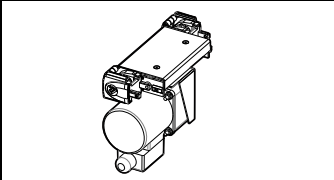

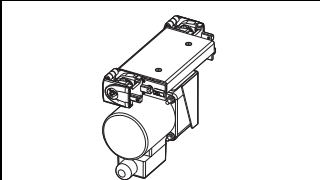

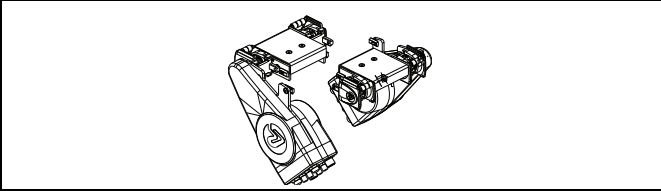

End drive units

Drive unit types

The XTC system includes direct driven units without slip clutch, and motors with fixed speed (F) or variable motor speed (V).

End drive units XTC

Left and right drive unit, with pallet guiding	Left and right drive unit, without pallet guiding
	
F	F
Mid drive unit, with pallet guiding	Mid drive unit without pallet guiding
	
F	F
Left and right double drive unit	
	
V	

Motor specifications

Motors are available for:

- Speed 5, 10, 15, 20 m/min, 50 Hz, 60W, 210 - 240V
- Speed 6, 12, 18 m/min, 60 Hz, 60W, 110V
- Speed 5, 10, 15, 20 m/min, 50Hz, 60W, 380 - 440V
- Speed 5 - 20 m/min, DC 24V

Ordering information

Drive units with motors must be specified using the web-based configurator. The configurator provides detailed information and step-by-step guidance in the specification process. A product code string is generated, containing the specification details.

Drive units *without* motors can be ordered using the designations in the catalogue.

- Connecting strips are included with the drive units.
- Slide rail must be ordered separately.

Dimension drawings in catalogue

Note that dimensions relating to drive unit motors depend on the motor specified during the configuration. In most cases, the motors shown in the catalogue drawings represent the largest size.

Minimum clearance distance

When two conveyors meet end to end, they must be separated by a minimum clearance distance, see the figure

Pallet guiding and without pallet guiding

### Support module for single conveyor module

Support module, configured item\* **XTUF S01A**

Including Beam support brackets 5052621 and Floor attachment brackets XCFA 170 S.

\* Use online configurator when ordering

### Support module for two parallel conveyor modules

Support module, configured item\* **XTUF S02A**

Including Beam support brackets 5052621 and Floor attachment brackets XCFA 170 S.

\* Use online configurator when ordering

### Support module for conveyor modules at two levels

Support module, configured item\* **XTUF S03A**

Including Beam support brackets 5052621 and Floor attachment brackets XCFA 170 S.

\* Use online configurator when ordering

### Support module for bends

Support module, configured item\* **XTUF S04**

Including Beam support brackets XUCS 44 and Floor attachment brackets XCFA 170 S.

\* Use online configurator when ordering

Note.

Two types of beam support brackets are used in the modules: type 5052621 and XUCS 44. The brackets are also available separately. See "Support brackets" on page 364.

## Beam support bracket for XTC

Beam support bracket, XTC

**5052621**

Mounting: ISO 4762 M6x 10 St 8.8 (2), XFAN 6 (2), MC6S 8x14 (2), XCAN 8 (2)

## Floor attachment bracket

Floor attachment bracket  
Stainless steel

**XCFA 170 S**

The bracket is delivered with the hardware necessary for attachment to the conveyor support. Fasteners for connection to the floor are not supplied with the brackets.

## Beam support bracket for 44 mm vertical support beam

Beam support bracket  
Aluminium, diecast

**XUCS 44**

For 44 mm vertical support beam  
Including mounting hardware.

# Conveyor System XT

## Conveyor – introduction

The XT twin track conveyor system is designed to handle longer transportation distances. Pallet functions, such as stops, locating stations and transfers will be used to connect other equipment and subordinated satellite stations to the XT conveyor.

XT is available in FlexLink five standard pallet widths. For custom specific widths, see X45H double drive unit.

Certain components in a XT conveyor, such as legs and beam sections, can be ordered pre-assembled.

### Beam design

The XT beams are designed for rigidity, smooth running and low noise. The T-slots ensure easy but rigid attachment of accessories such as guide rail brackets.

*Cross-section of straight section conveyor beam*

### Examples of application areas

Manual and automatic assembly and test systems in the automotive and electrical/electronics industries. Examples: gearboxes, computers, sewing machines, mobile phones, automotive seat guiderails, eyeglasses, injection-moulded parts, fishing reels, car instrument kits

## Conveyor beam section

### Qty of cross section beams:

170-1000 mm	1 pc
1001-2000 mm	2 pcs
2001-3000 mm	3 pcs

### Beam section (assembled) configured item\*

PW= 240, 320, 400, 480, 640

L=Length to order (170–3000 mm)

W= Width to order (210–610 mm)

**XTCB LD**

### Beam section (assembled) for pallets 240 mm wide.

Length 3000 ±1,5 mm

**XTCB 3D210**

### Beam section (assembled) for pallets 320 mm wide.

Length 3000 ±1,5 mm

**XTCB 3D290**

### Beam section (assembled) for pallets 400 mm wide.

Length 3000 ±1,5 mm

**XTCB 3D370**

### Beam section (assembled) for pallets 480 mm wide.

Length 3000 ±1,5 mm

**XTCB 3D450**

### Beam section (assembled) for pallets 640 mm wide.

Length 3000 ±1,5 mm

**XTCB 3D610**

\* Use online configurator when ordering

## Conveyor beam

Beam  
Length 3000 +10/-0 mm  
Length to order (30- 3000 mm)

**XTCB 3**  
**XTCB L**

## Connecting strip kit

Connecting strip kit  
Steel, electro-zinc-plated

**5053503**

*Kit with two connecting strips. Including M8 set screws.  
Not for XTC beam*

## Drill fixture for conveyor beam

Drill fixture for conveyor beam

**5123264**

*To be used when drilling a 10 mm hole for Connecting strip kit 5053503.*

## Tools and accessories, 44×44 beam

### Beam 44 mm × 44 mm with three T-slots

Beam 44 mm × 44 mm with three T-slots  
Aluminium, anodized  
Length 3000 mm (3030 ±5 mm)  
Length to order (30- 3000 mm)

**XCBL 3×44 T3**  
**XCBL L×44 T3**

### Drill fixture for T-slot connector

Drill fixture Ø10/18,25 mm

**XCAD 10/18**

Drill insert Ø12,2 mm (for T-slot connector)

**18×16 12.2**

*To be used when drilling a 12 mm hole for T-slot connector XCEC 12, located 22 mm from the beam end. Remove the 10 mm drill insert delivered with the drill fixture and install the 12,2 mm drill insert.*

### T-slot connector for 44×44 beam

T-slot connector  
Steel, electro-zinc-plated

**XCEC 12**

**Cover strip, aluminium**

Cover strip  
Length 2 m  
Aluminium, anodized

**XCAC 2***Note! Can't be used with bends***Cover strip for T-slot, PVC**

Cover strip for T-slot  
Length 25 m  
Grey PVC

End drive unit

Dimension drawings in catalogue

Note that dimensions relating to drive unit motors depend on the motor specified during the configuration. In most cases, the motors shown in the catalogue drawings represent the largest size.

Minimum clearance distance

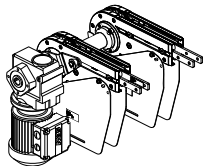

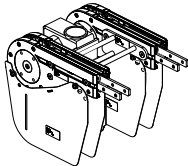

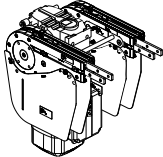

When two conveyors meet end to end, they must be separated by a minimum clearance distance, see the figure below.

End drive unit types

The XT system includes direct driven units without slip clutch and motors with fixed speed (**F**).

End drive units XT

F	F
Mid drive unit, heavy	
	
F	

Motor specifications

Motors are available for 230/400 V, 50 Hz and 230/460 V or 330/575 V, 60 Hz. All motors can be connected for delta or star configuration by means of jumpers.

Ordering information

Drive units with motors must be specified using the web-based configurator. The configurator provides detailed information and step-by-step guidance in the specification process. A product code string is generated, containing the specification details.

Drive units *without* motors can be ordered using the designations in the catalogue.

- Connecting strips are included with the drive units.
- Slide rail must be ordered separately.

# XT support modules

## Support modules S01A/S02A/S03A/S04

### Support module for single conveyor module

Support module **XTUF S01A**

Including Beam support brackets 5052899 and Floor attachment brackets XCFA 170 S.

### Support module for two parallel conveyor modules

Support module **XTUF S02A**

Including Beam support brackets 5052899 and Floor attachment brackets XCFA 170 S.

### Support module for conveyor modules at two levels

Support module **XTUF S03A**

Including Beam support brackets 5052899 and Floor attachment brackets XCFA 170 S.

### Support module for wheel bends

Support module **XTUF S04**

Including Beam support brackets XLCS 64 and Floor attachment brackets XCFA 170 S.

#### Note.

Two types of beam support brackets are used in the modules: type 5052899 and type XLCS 64. The brackets are also available separately. See "Support brackets" on page 381.

## Beam support bracket for XT

Beam support bracket, XT **5052899**

Mounting: MC6S 8×14 (4), XCAN 8 (4)

## Beam support bracket, diecast aluminium, for 64 mm vertical support beam

Beam support bracket for X65,  
Type CS

Aluminium, diecast

**XLCS 64 C**

For 64 mm vertical support beam

Cannot be used with drip trays

Mounting: XLAT 17 (1), XLAN 8 (1), XCAN 8 (1),  
M6S 8×16 (1), BRB 8.4×16 (2)

For support of X65 X-bend, order M6S 8×16 screw  
instead of the XLAT 17 T-slot screw.

Incl. Cap 5110134 (2)

## Floor attachment bracket

Floor attachment bracket  
Stainless steel

**XCFA 170 S**

The bracket is delivered with the hardware necessary  
for attachment to the conveyor support. Fasteners for  
connection to the floor are not supplied with the brackets.

# XT Pallet function

## Pallets

### Introduction

Ten pallet sizes are available:

240 × 240 mm  
 240 × 320 mm  
 320 × 320 mm  
 320 × 400 mm  
 400 × 400 mm  
 400 × 480 mm  
 400 × 640 mm  
 480 × 480 mm  
 480 × 640 mm  
 640 × 640 mm

For non-standard pallet dimensions, or for other pallet plate materials than steel, frame section kits and bushing kits can be ordered, see next page.

*Pallet width (PW) × pallet length (PL)*

Pallet width and pallet length. PL is basically the pallet dimension in the direction of pallet movement in the main flow. In some modules the pallet moves “sideways”, for example when transferred from one line to another. The figure below shows an example.

Side view

Top view

Bottom view

### Pallet loading

Recommended centre of gravity of the product on the pallet (including fixture) should be located within the grey marked area according to the picture to the right.

### Technical specifications

- Maximum load on the pallet is 8 kg per 100 mm of pallet length (PL).
- Friction between pallet and chain,  $\mu_p = 0,3$  (under normal conditions).
- The table below shows maximum pallet load for each pallet size.

Size (PW × PL)	Pallet weight (kg)	Max load on pallet (kg)
240 × 240 mm	2,6	17
240 × 320 mm	3,5	22
320 × 240 mm	3,5	16
320 × 320 mm	4,4	22
320 × 400 mm	5,5	24
400 × 320 mm	5,5	20
400 × 400 mm	6,8	23
400 × 480 mm	8,2	22
400 × 640 mm	10,8	19
480 × 400 mm	8,2	22
480 × 480 mm	9,8	20
480 × 640 mm	13,0	17
640 × 400 mm	10,8	19
640 × 480 mm	13,0	17
640 × 640 mm	17,4	13

### Material specifications

Pallet plate ..... 5 mm ±0,1 steel plate  
 Frame..... Electrically conductive UHMW-PE

**Pallet PW×PL**

Ø12 H7 (4×)

\*

PW×PL	240×240	240×320	320×320	320×400	400×400	400×480	400×640	480×480	480×640	640×640
	0,3	0,5	0,5	0,6	0,6	0,8	0,8	0,8	1,0	1,0

Pallet PW × PL mm

**XTPP PW×PL**

When ordering, insert the pallet width and the pallet length instead of PW×PL in the designation.

**Frame section kit**

- Frame section kit 240 mm
- Frame section kit 320 mm
- Frame section kit 400 mm
- Frame section kit 480 mm
- Frame section kit 640 mm

**5056945**  
**5056950**  
**5056938**  
**5056940**  
**5056952**

Each kit contains two frame pieces, four bushings and four initiation plates with screws. The frames and bushings are suitable for screws type MC6S M6×16 (not included). Two kits are required for each pallet.

For use as spare parts and for building non-standard pallets in combination with customer supplied pallet plates.

**Bushing kit**

- Four bushings

**5056944**

For building non-standard pallets in combination with customer supplied pallet plates. The bushings are designed for plate thickness 5 mm and should be press-fitted into Ø16 mm holes.

## Stop function module P11

### Stop function

D = D00

D = D01

D = D02

Stop function\*

**XTUS P11**

*Singles and stops one pallet at a time along the conveyor line with a repeatability of  $\pm 1$  mm. The stop units can be mounted on the opposite side of the beam to facilitate pallet stopping at the front end of the pallet.*

*\* Use online configurator when ordering  
(Part list see, Page 384 parts included in module)*

### Part list for Stop function module XTUS P11

#### Part list for XTUS P11

##### D00=No damping

Stop function module P11	Item number	Name	Qty
	(5055686)	Part list for XTUS P11	1

	- XTPD D100	Damped stop (see Page 386)	1
	5055955	Side support (see Page 387)	1

Included in the delivery:

- The necessary number of stoppers and sensor brackets, based on the option selected.
- The necessary mounting hardware required for attachment to an XT or XTC conveyor.

## Pallet stop, undamped

Maximum load vs. conveyor speed

Pallet stop, undamped, 0–200 kg **XTPD U200**

Pressure range: Treated compressed air: 4–8 bar

Air connection: 6 mm outside diameter tubing

Separating function:

Open: pneumatically. Close: spring-loaded.

Mounting hardware is included.

To reduce the noise level, the stopper includes an integrated throttle valve. The throttle setting can be adjusted by means of a screwdriver.

The diagram shows the maximum permissible weight of a group of pallets (product weight + pallet weight), which the stop device is capable of stopping, as a function of the conveyor speed.

## Pallet return stop, undamped

Stop XTPD UR prevents the pallet from sliding backwards.

Pallet return stop, undamped **XTPD UR**

Used in combination with pallet stop devices

XTPD U200, D35 or D100.

The necessary mounting hardware for attachment to an XT or XTC conveyor is included in the delivery.

## Pallet stop device, damped

Damped stopper, 0–35 kg

**XTPD D35**

Pressure range: Treated compressed air: 4–8 bar  
Air connection: 6 mm outside diameter tubing  
Separating function:  
Open: pneumatically. Close: spring-loaded  
Mounting hardware is included.

To reduce the noise level, throttle valves should be used (M5). These are not included. The diagram shows the maximum permissible weight of a group of pallets (product weight + pallet weight), which the stop device is capable of stopping, as a function of the conveyor speed.

## Pallet stop device, damped

Damped stopper, 0–100 kg

**XTPD D100**

Pressure range: Treated compressed air: 4–8 bar  
Air connection: 6 mm outside diameter tubing  
Separating function:  
Open: pneumatically. Close: spring-loaded  
Mounting hardware is included.

To reduce the noise level, throttle valves should be used (M5). These are not included. The diagram shows the maximum permissible weight of a group of pallets (product weight + pallet weight), which the stop device is capable of stopping, as a function of the conveyor speed.

Side support for pallet stop

Side support **5055955**

*The side support is used with pallet sizes larger than 320 mm x 320 mm to minimize the transverse force on the side guide. Hardware for attachment to the conveyor is included in the delivery.*

Dampers

Damper, parallel to main

XTC conveyor beam

XT conveyor beam

Damper, 0–30 kg **XTPA CM35**

Note

*The damper is easily influenced by pressure from other pneumatic equipment. To avoid this interference the damper must be connected to a separate pneumatic valve.*

Maximum load vs. conveyor speed

*The diagram shows the maximum permissible weight of a group of pallets (product weight + pallet weight), which the damper is capable of stopping, as a function of the conveyor speed.*

*The pneumatic damper XTPA CM35 is used when pallets up to 30 kg have to be damped and transferred from a parallel conveyor to the main conveyor.*

*Mounting hardware is included in the delivery.*

*Pressure range: Treated compressed air, 4–8 bar*

*Air connection: 6 mm outside diameter tubing*

*Damping function:*

*Stop in initial position: pneumatically*

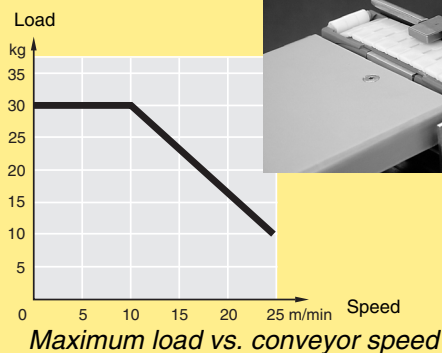

## Damper, main to parallel

XTC conveyor beam

Damper, 0–30 kg	
PW 240 mm, L=136	<b>XTPA MC35 240 A</b>
PW 320 mm, L=216	<b>XTPA MC35 320 A</b>
PW 400 mm, L=296	<b>XTPA MC35 400 A</b>
PW 480 mm, L=376	<b>XTPA MC35 480 A</b>
PW 640 mm, L=536	<b>XTPA MC35 640 A</b>

Mounting hardware is included in the delivery.

The diagram shows the maximum permissible weight of a group of pallets (product weight + pallet weight), which the damper is capable of stopping, as a function of the conveyor speed.

Pressure range: Treated compressed air, 4–8 bar

Air connection: 6 mm outside diameter tubing

Damping function: Stop in initial position, pneumatically

Note.

The damper is easily influenced by pressure from other pneumatic equipment. To avoid this interference the damper must be connected to a separate pneumatic valve.

Sensor bracket Type V001

Vertical sensor bracket **XTPB V001**

The sensor bracket holds a  $\varnothing 12$  mm vertical sensor and can be mounted on the stopper XTPD U200 and the damped stopper XTPD D35. Mounting hardware is included in the delivery. Proximity switch is not included.

Sensor bracket Type V003

Vertical position sensor bracket **XTPB V003**

The position sensor has an increased range and is mounted on the outside of the beam of an XT or XTC conveyor. It is intended for use with a  $\varnothing 12$  mm proximity switch. Mounting hardware is included in the delivery. Proximity switch is not included.

Sensor bracket Type V002

Vertical sensor bracket **XTPB V002**

The sensor bracket holds a  $\varnothing 12$  mm vertical sensor and is mounted on the inside of the beam. Mounting hardware is included in the delivery. Proximity switch not included

Sensor bracket Type H001

Horizontal sensor bracket **XTPB H001**

The sensor bracket holds a  $\varnothing 12$  mm horizontal proximity switch and is mounted on the outside of the beam of an XT or XTC conveyor. Mounting hardware is included in the delivery. Proximity sensor is not included. The horizontal proximity sensor ( $\varnothing 12$  mm) must have a minimum effective sensing distance of 5 mm to the steel initiator plate in the pallet. Example: The effective sensing distance for SICK (IM12 sensing range 8 mm) is 6,48 mm. This is calculated as follows:  $8 \text{ mm} \times 0,81^*$ . Useful sensing range =  $0,81 \times \text{nominal sensing range}$ .

## Transfer module S10 A

### Transfer module S – main to cross

Transfer module S10\*

**XTUT S10 A**

For transfer of pallets/products away from a conveyor.  
Maximum lifting payload: 30 kg at 6 bar.

\* Use online configurator when ordering  
(Part list see Page 391, parts included in module)

## Transfer module S12 A

### Transfer module S – cross to mid main

Transfer module S12\*

**XTUT S12 A**

For receiving of pallets/products to a conveyor with  
oncoming traffic.  
Maximum lifting payload: 30 kg at 6 bar.

\* Use online configurator when ordering  
(Part list see Page 391, parts included in module)

## Transfer module S11 A

### Transfer module S – cross to end main

Transfer module S11\*

**XTUT S11 A**

For receiving of pallets/products to a conveyor without  
oncoming traffic.  
Maximum lifting payload: 30 kg at 6 bar.

\* Use online configurator when ordering  
(Part list see Page 391, parts included in module)

### Motor

The transfer units are delivered with 15 m/min (E1) or  
18 m/min (A1) motor.

### Included in the delivery:

- One pneumatic transfer unit including the necessary proximity sensors.
- The necessary mounting hardware required for attachment to an XT or XTC conveyor.
- The required number of stoppers, dampers and sensor brackets based on the options selected.

Standard chain, 50 Hz	<b>XTPT PWxPL-01</b>
Standard chain, 60 Hz	<b>XTPT PWxPL-02</b>
Conductive chain, 50 Hz	<b>XTPT PWxPL-03</b>
Conductive chain, 60 Hz	<b>XTPT PWxPL-04</b>

When ordering, insert the pallet size instead of PWxPL in the designation.

\*For the following pallet sizes (PWxPL):

240x240: C-C=210, W=169, L=259

240x320: C-C=290, W=169, L=339

320x240: C-C=210, W=249, L=259

### Motor cable connector

The connector for motor cable is a male 3-pole insert with a housing for the insert. To connect, a female 3-pole insert with a hood for the insert and a screw cap for the hood are required (not supplied by FlexLink). Suitable types are Weidmüller 1498200000 (insert), 1788520000 (hood), and 13-08080521 (M20 screw cap), or equivalent.

The diagram shows the maximum permissible weight of a pallet (product weight + pallet weight), which the transfer is capable of stopping, as a function of the conveyor speed. This diagram applies to transfers type M1, M2 and L.

## Pneumatic transfer Type M2

## Pneumatic transfer Type M2\*

## Pallet locating station

The locating station consists of locating cylinders including pins and brackets. Larger pallets may require additional lifting force. A lift unit kit 5055802 is available which contains two lift units without guide pins. Pressure range, treated compressed air: 4–8 bar  
Air connection: 2×6 mm outside diameter tubing  
Pallet lifting height: 1,5 mm  
Maximum vertical force per cylinder at 0,6 MPa: 544 N  
Throttle valves and the necessary mounting hardware for attachment to an XT or XTC conveyor are included.

Locating station

**XTPX P11 A**

See chapter See “Locating function module P11 A” on page 396 for information about the locating function module.

## Lift unit kit

Lift unit kit

**5055802**

Kit consists of two lift units without guide pins. To be used for large pallets (PW or PL >400 mm). Suitable sensors: SICK, MZT1-03VPS-KR0 magnetic cylinder sensor, DC 3-wire.

The lift-and-locate function is used when a product needs to be located at a specific height prior to a machine operation.

Lift-and-locate module

Lift-and-locate function module\*

XTUL P12

This product is available for all XT pallet sizes.

\* Use online configurator when ordering  
(Part list see Page 400, parts included in module)

The lift-and-locate unit consists of a plate which can be elevated by a pneumatic cylinder. The plate has two locating pins. The unit can be delivered with top plates adapted for the standard pallet sizes.

Maximum lift force at centre (0,6 MPa): 1177 N

Lift height: 0–225 mm (adjustable)

Locating repeatability in x and y directions: ±0,05 mm

In order to avoid influence from conveyor movements, attach the conveyor to a reference support.

It is recommended to enclose the unit to protect persons from the clamp risk.

Delivery

- One lift-and-locate module, including non-return throttle valves.
- The necessary number of stoppers and sensor brackets, based on the option selected.
- The necessary mounting hardware required for attachment to an XT or XTC conveyor,
