

Getinge Cage Handling System

- for tunnel washers

Loading system 3. Pallet entrance 2. Conveyor Light barrier protected Soiled cages are conveyed in a safe and controlled to prevent unadmitted manner to the robot. access. 1. Safety barriers 7. Tunnel washer Protect staff from accessing Cage cleaning 8. Sorting table when robots and system Clean and dry cages performed by the are in operation. 10. Collection point tunnel washer arrive to the sorting Cages are stacked for through a multiple table where they will transportation to the be re-aligned to be treatment process. collected by the robot. sterilization process. 4. Loading robot An industrial robot empties the soiled bedding into a dump station. 5. Cage gripper Handles most common cage 6. Washing types. Depending on the gripper The robot then places the up to four cages can be handled. cages in the tunnel washer.

Safe and efficient cage handling system

Getinge provides the highest level of planning support to architects, planners, engineers and general contractors. Getinge can assist with CAD layouts and design support, producing complete specifications along with equipment drawings and technical specifications, detailed utility analysis, capacity planning and full plan drawings ensuring code compliance. Getinge's main focus is to provide the most

cost effective and reliable solution for your Vivarium

Getinge Cage Handling System is an automated process for robotic cage handling that addresses the need to efficiently process animal cages in a vivarium during the cage cleaning. The system combines industrial robots with a tunnel washer for high throughput facilities in cost effective way.

Main benefits:

Improved operator safety
 The robotic automation ensures minimized operator exposure to potentially harmful airborne dust and allergens and improves the ergonomics.

9. Unloading robot

An industrial robot positions the cages

under the bedding dispensing station.

- Increased productivity
 Increased productivity and maximized throughput due to a system combination of industrial robots and tunnel washers for handling of cages.
- Optimal cage process flow
 Getinge's worldwide reach and
 extensive installed product base
 provides the knowledge necessary
 to assist our customers in planning
 for optimal and efficient cage process flow that help manage
 operating costs.
