

Tender Blend

Designed to delicately process materials

The Scott Tender Blend is a continuous process mixer designed to mix products with larger particle sizes, such as pellets, flakes, and whole or textured grains. The Tender Blend delicately processes materials that must be mixed and not damaged. This mixer is also ideal for combining liquids with coarse products using a liquid system.

Designed to mix products with larger particle sizes:

- Textured animal feed
- Pellet mill conditioner
- Flaked plastics
- Granulated fertilizers
- Textured or flaked food products

The Tender Blend is commonly used in:

- Animal feed
- Food
- Chemical
- Fertilizer

Innovative solutions for your processing challenges

Features:

- Provides continuous mixer with low agitation on the product to minimize degradation
- Available in carbon steel, stainless steel, and various other construction materials, including food-grade.
- Gentle mixing of two to six ingredients with liquid addition ports is available for coating applications.
- UHMW liners, as well as heating or cooling jackets, are optional
- Ribbon/Paddle design encourages forward and delicate processing motion
- Paddle/Paddle design offers an even gentler mixing of products
- Adjustable paddle impedes forward movement for maximum product mixture
